Making tech more diverse and welcoming by bringing people together and helping teach programming skills.

Students

Our students come from a variety of backgrounds. Some want to become full-time developers, whereas some would like to learn the basics of coding in a supportive environment.

Coaches

We have a selection of HTML/CSS, JavaScript, Ruby, Python and Git tutorials for the students. We're always on the lookout for more developers to join our community and help coach at our workshops.

Workshops

We are hosted by some amazing companies who support our cause. Our normal format is 30 minutes of socialising with food and drink, followed by a lightning talk then coding.
