Making tech more diverse and welcoming by bringing people together and helping teach programming skills.

Students

Our students come from a variety of backgrounds. Some want to become full-time developers, whereas some would like to learn the basics of coding in a supportive environment.

Workshops

We are hosted by some amazing companies who support our cause. Our normal format is 30 minutes of socialising with food and drink, followed by a lightning talk then coding.

Coaches

We have a selection of HTML/CSS, JavaScript, Ruby, Python and Git tutorials for the students. We're always on the lookout for more developers to join our community and help coach at our workshops.
