COACHING 101

Assume that anyone you're teaching has no knowledge but **infinite intelligence**.

Do not take over the **keyboard**! This can be off-putting and scary.
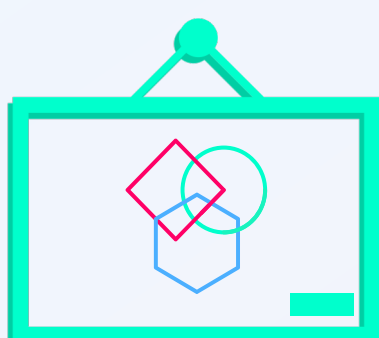

Take it slow, it's about **learning**. Allow for time between **questions**.

Let students **try answering** a question first. Help with open questions. Encourage a **discussion**.

Work **collaboratively** with your student

It's okay to make mistakes - that's where you learn Be **supportive**, but let your student **explore**.

Use pen and paper or go to a whiteboard! **Drawing** and **visualising** is really helpful.
